What do you do for fun? What are you curious about? What have you always wanted to find out about, make, create, or do? *(Please see the end of this document for more ideas)*

---

**What do you want to know more about in this topic** - Specifically? *For example, If I am passionate about The Environment: What (elements) do humans, the Earth and Ocean Water have in common? How does Pollution impact each system? How is yarn made? Where does it come from?....*

## TECHNOLOGY

### Here are some further questions to think about!

- What might I design/ invent/ create that would entertain or help others?
- What useful or aesthetically pleasing item might I create by recycling or reusing things that are no longer needed at home?
- How might I record and share my own and others' feelings during this time, in a creative way?
- What am I fascinated by? How might I investigate it further through the lens of creativity?
- What do I care deeply about? How might I make a difference to others right now?
- Who do I admire? What can I learn from them? How might I go about connecting with them?
- What might I learn about that could change me? How might I use my learning to change others?
- How might I document this moment in history in an interesting and creative way? How might I adapt this for different audiences?
- If I could reimagine school, what would it be like?
- If I could reimagine my class, what would it be like?
- If I could reimagine *anything*, what would it be like? (a library, shoes, a sport, a kitchen, a museum, a book, a toy...)
- What have I learned during this time? How might life be better as a result? Can I create a manifesto for my future?
